State Machine — Example

A state continues while its STAY condition is true. A TRANSITION occurs only when the transition condition is met.

Present State	Next State		Output	
	Input=0	Input=1	For Input 0	For Input 1
00	11	01	0	0
01	11	00	0	0
10	10	11	0	1
11	10	10	0	1
